

Publication Validation Report (pub-check): OpenEoX Core Schema Version 1.0 CSD01

Field	Value
TC	openeox
Stage	csd01
Package validated	https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/ (as-published tree, OASIS-Docs/openeox HEAD)
Ticket	TCADMIN-4725
Validation date	2026-07-16
Tool	oasis_pub_check.py (OASIS-Docs/publication-assurance)
Coverage	92 individual checks across 34 check classes, all run
Findings	0 error, 9 warning, 3 informational
Blockers	0

Result

PUBLICATION-READY: zero blockers. 26 of 34 check classes are fully clean (66 of 92 individual conditions in clean classes); every finding is itemized below against the check that raised it.

Triage: this validation ran against the ALREADY-PUBLISHED csd01 tree, so the revision-collision warnings record the tool correctly seeing this same publication live (expected in a post-publication run, not a defect). The front-matter version warnings are intentional external references to the CSAF v2.1 specification. The 'Will be filled in' acknowledgment placeholders were shipped deliberately by the TC for this early stage and must be resolved before CS. Zero blockers: the package is publication-ready and was published 13 July 2026.

Check-by-Check Results

Every check class the tool carries is listed, whether or not it raised a finding. Conditions is the number of individual verifications inside the class.

#	Result	Check class	Cond.	Findings
1	PASS	asset-refs	1	none
2	PASS	case	3	none
3	WARN	cover-hr	1	WARN: Horizontal rule between the OASIS logo and the title: the publication CSS treats as a page break, which opens the PDF with a blank page. Harmless in other renderers; remove if publishing through the OASIS HTML-to-PDF path.
4	PASS	date-sync	2	none
5	PASS	dead-lists	3	none
6	PASS	double-slash	1	none
7	PASS	fence-collapse	1	none
8	PASS	filenames	6	none

#	Result	Check class	Cond.	Findings
9	WARN	front-matter	12	WARN: URL declares version v2.1 (package is v1.0): https://docs.oasis-open.org/csaf/csaf/v2.1/csaf-v2.1.html -- confirm this is an intentional external reference. WARN: URL declares version v2.1 (package is v1.0): https://docs.oasis-open.org/csaf/csaf/v2.1/csd01/csaf-v2.1-csd01.html -- confirm this is an intentional external reference.
10	PASS	generator	1	none
11	PASS	html-anchors	2	none
12	PASS	html-residue	3	none
13	PASS	html-title	2	none
14	PASS	image-policy	10	none
15	PASS	junk-files	2	none
16	PASS	link-mismatch	1	none
17	PASS	logo	1	none
18	INFO	manifest	3	INFO: No manifest.json in the package. Emit one (--emit-manifest or your own tool) and intake verification becomes automatic.
19	WARN	md-links	2	WARN: Dual link url ; prefer a bare URL (autolinked) or real anchor text: https://www.oasis-open.org/committees/openeox/ipr.php WARN: Dual link url ; prefer a bare URL (autolinked) or real anchor text: https://www.oasis-open.org/policies-guidelines/trademark/
20	PASS	package-refs	1	none
21	PASS	pdf-cover	2	none
22	WARN	pdf-fonts	2	WARN: PDF embeds fonts not declared by the package's own CSS: LibertinusSerif, NewCM10, NewCMMath. The CSS declares: couriernew, liberation sans. Confirm the divergence is intentional (pdf fonts <file.pdf> re-checks this after a toolchain change).
23	PASS	pdf-sync	5	none
24	PASS	previous-stage	2	none
25	WARN	residue	3	WARN: 'Will be filled in ...' placeholder present in markdown (acceptable for an early stage; must be resolved before CS). WARN: 'Will be filled in ...' placeholder present in html (acceptable for an early stage; must be resolved before CS).
26	WARN	revision-collision	1	WARN: Stage /csd01/ is already published at https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/ ; a NEW submission for v1.0 must use the next revision number instead. Ignore this warning if you are re-checking the published package itself. INFO: Published stages already live under https://docs.oasis-open.org/openeox/eox-core/v1.0/ : csd01.
27	PASS	rfc-keywords	2	none
28	PASS	schema-id	4	none
29	PASS	stage-name	3	none
30	PASS	symlinks	1	none
31	PASS	template	3	none
32	INFO	template-css	2	INFO: HTML ships its own stylesheet rather than the canonical markdown-styles CSS; fonts match the template family. Accepted practice (OpenEoX publishes this way), noting it for the record.
33	PASS	version-naming	3	none

#	Result	Check class	Cond.	Findings
34	PASS	vml-fallback	1	none

All Individual Conditions: Observed vs Expected

Every one of the 92 individual conditions the tool verifies, with the value its logic pulled from this package and what that value was compared against. NA rows state why a condition was not applicable to this package (authoring track or absent prerequisite); nothing is silently skipped.

#	Result	Condition verified	Value pulled (observed)	Compared against
1	PASS	stage-name: Stage directory name carries a two-digit revision number	stage_directory: csd01	valid stage prefixes must carry a two-digit suffix (csd01, never bare csd)
2	PASS	stage-name: Stage token is not a retired abbreviation	stage_directory: csd01	retired token set (csprd, cnprd, cos, csdpr, cndpr) per Naming Directives v1.7
3	PASS	stage-name: Stage token is a recognized current stage	stage_directory: csd01	valid stage set: wd, csd, cs, cnd, cn, os, ps, psd, pn, pnd, errata
4	PASS	version-naming: Version directory matches the vN.N(.N) convention	version_directory: v1.0; delivery_stem: eox-core-v1.0-csd01	the Naming Directives version-segment pattern vN.N(.N), e.g. v1.0, v2.0.1
5	PASS	version-naming: Version embedded in the delivery filename agrees with the version directory	version_directory: v1.0; delivery_stem: eox-core-v1.0-csd01	the version directory the package publishes under
6	PASS	version-naming: Delivery filename embeds the version segment	version_directory: v1.0; delivery_stem: eox-core-v1.0-csd01	the Naming Directives filename shape <base>-<version>-<stage>
7	WARN	revision-collision: The submitted stage does not already exist on the live site	Stage /csd01/ is already published at https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/ : a NEW submission for v1.0 must use the next revision number instead. Ignore this warning if you are re-checking the published package itself.	expected non-200 for a NEW submission; an existing stage means the revision must increment
8	PASS	filenames: The stage directory contains delivery items at all	stems: eox-core-v1.0-csd01; delivery_files: eox-core-v1.0-csd01.html, eox-core-v1.0-csd01.md, eox-core-v1.0-csd01.pdf; formats_present: html, md, pdf; required_formats: html, md, pdf	at least one delivery item (md/docx/odt/html/pdf) must be present
9	PASS	filenames: All delivery items share one basename	stems: eox-core-v1.0-csd01; delivery_files: eox-core-v1.0-csd01.html, eox-core-v1.0-csd01.md, eox-core-v1.0-csd01.pdf; formats_present: html, md, pdf; required_formats: html, md, pdf	exactly one distinct stem across md/docx/odt/html/pdf
10	PASS	filenames: Delivery filename carries no working token	stems: eox-core-v1.0-csd01; delivery_files: eox-core-v1.0-csd01.html, eox-core-v1.0-csd01.md, eox-core-v1.0-csd01.pdf; formats_present: html, md, pdf; required_formats: html, md, pdf	forbidden working tokens: draft, tmp, rc (files are named for the published stage)
11	PASS	filenames: Delivery filename ends in the stage suffix	stems: eox-core-v1.0-csd01; delivery_files: eox-core-v1.0-csd01.html, eox-core-v1.0-csd01.md, eox-core-v1.0-csd01.pdf; formats_present: html, md, pdf; required_formats: html, md, pdf	the stage directory name as a -<stage> suffix
12	PASS	filenames: All required delivery formats are present	stems: eox-core-v1.0-csd01; delivery_files: eox-core-v1.0-csd01.html, eox-core-v1.0-csd01.md, eox-core-v1.0-csd01.pdf; formats_present: html, md, pdf; required_formats: html, md, pdf	the track's required set: html+pdf plus the authoritative source (md, docx, or odt)
13	PASS	filenames: An authoritative source artifact travels with the renderings	stems: eox-core-v1.0-csd01; delivery_files: eox-core-v1.0-csd01.html, eox-core-v1.0-csd01.md, eox-core-v1.0-csd01.pdf; formats_present: html, md, pdf; required_formats: html, md, pdf	at least one authoritative source (.md, .docx, or .odt) expected beside HTML/PDF

#	Result	Condition verified	Value pulled (observed)	Compared against
14	PASS	front-matter: Markdown front matter carries a This-stage URL block	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	at least one URL must be declared
15	PASS	front-matter: Every stage URL is under docs.oasis-open.org	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	the canonical site prefix https://docs.oasis-open.org/
16	PASS	front-matter: This-stage URLs carry the version and stage path segments	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	the package's <code><version>/</code> and <code><stage>/</code> path segments
17	PASS	front-matter: Every This-stage URL points at a file shipped in the package	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	the set of delivery filenames actually in the package
18	PASS	front-matter: The This-stage block lists all three artifacts (md, html, pdf)	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	the full delivery set: .md, .html, .pdf
19	PASS	front-matter: Latest-stage URLs point at the persistent version root	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	must NOT contain the <code><stage>/</code> segment (latest is the version-root path)
20	PASS	front-matter: Latest-stage URLs are under the package's version directory	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	the package's <code><version>/</code> path segment

#	Result	Condition verified	Value pulled (observed)	Compared against
21	WARN x2	front-matter: Any docs.oasis-open.org URL declaring a different version is intentional	URL declares version v2.1 (package is v1.0): https://docs.oasis-open.org/csaf/csaf/v2.1/csaf-v2.1.html -- confirm this is an intentional external reference. URL declares version v2.1 (package is v1.0): https://docs.oasis-open.org/csaf/csaf/v2.1/csd01/csaf-v2.1-csd01.html -- confirm this is an intentional external reference.	the package's own version; a different version is a stale-draft tell unless external
22	PASS	front-matter: No Latest-labelled line cites a stage-pinned URL for this spec	this_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/csd01/eox-core-v1.0-csd01.pdf ; latest_stage_urls: https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.html , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.md , https://docs.oasis-open.org/openeox/eox-core/v1.0/eox-core-v1.0.pdf	the persistent version-root form (no <stage>/ segment)
23	NA	front-matter: HTML cover carries a This-version URL block	NA: DOCX-render condition; this package carries no Word source	at least one URL must be present
24	NA	front-matter: Cover This-version URLs carry the version and stage segments	NA: DOCX-render condition; this package carries no Word source	the package's <version>/ and <stage>/ path segments
25	NA	front-matter: Cover Latest-version URLs point at the persistent version root	NA: DOCX-render condition; this package carries no Word source	must NOT contain the <stage>/ segment
26	PASS	residue: No editor TODO markers left in prose	scanned: html, markdown	the patterns TODO(...) and TODO: must not occur
27	PASS	residue: No bare 'tbd' placeholder sections	scanned: html, markdown	no line consisting solely of 'tbd'
28	WARN x2	residue: No 'Will be filled in' placeholders (early-stage tolerated, must resolve before CS)	'Will be filled in ...' placeholder present in markdown (acceptable for an early stage; must be resolved before CS). 'Will be filled in ...' placeholder present in html (acceptable for an early stage; must be resolved before CS).	the phrase 'Will be filled in' must not occur
29	PASS	html-title: HTML title carries no working residue	title: OpenEoX Core Schema Version 1.0	must not end in tmp, draft, or wip
30	PASS	html-title: HTML title is a plausible document title	title: OpenEoX Core Schema Version 1.0	a full spec title (at least 8 characters)
31	PASS	html-residue: No stale pandoc title-block header in the HTML	title_block_headers: 0; runner_paths: 0	the <header id="title-block-header"> element must be absent (lint D2)
32	PASS	html-residue: No CI runner paths in HTML hrefs or srcs	title_block_headers: 0; runner_paths: 0	the /home/runner/ path prefix must not occur (lint D3)
33	PASS	html-residue: The document title appears in exactly one H1	title_block_headers: 0; runner_paths: 0	exactly 1 (more renders the title twice on the PDF cover, lint D1)
34	PASS	html-anchors: Every internal fragment link resolves to an anchor	internal_links: 91; anchors: 273; unresolved: 0	every referenced fragment must exist as an id or <a name>
35	PASS	html-anchors: The HTML carries a linked table of contents	internal_links: 91; anchors: 273; unresolved: 0	at least one expected (a spec HTML without any is missing its TOC links)
36	WARN x2	md-links: No dual url links in the markdown	Dual link url; prefer a bare URL (autolinked) or real anchor text: https://www.oasis-open.org/committees/openeox/ipr.php Dual link url; prefer a bare URL (autolinked) or real anchor text: https://www.oasis-open.org/policies-guidelines/trademark/	text and target being the same URL calls for a bare autolink or real anchor text
37	PASS	md-links: No bare URL runs into '.' without a space	links_scanned: 53	the safe form '.' (otherwise pandoc pulls the period and backslash into the href)
38	PASS	fence-collapse: No opening code fence carries trailing text in its info string	fences_scanned: 42	a bare language token or curly-attribute form; trailing text collapses the block (lint D6)
39	PASS	image-policy: No empty img src attributes	img_tags: 1; image_payload_bytes: 0	src must be non-empty

#	Result	Condition verified	Value pulled (observed)	Compared against
40	PASS	image-policy: No absolute-path image sources	img_tags: 1; image_payload_bytes: 0	a leading / resolves outside the package on publication
41	PASS	image-policy: No path-traversal image sources	img_tags: 1; image_payload_bytes: 0	the path must not contain .. segments
42	PASS	image-policy: No responsive srcset image constructs	img_tags: 1; image_payload_bytes: 0	the publication pipeline's self-containment policy refuses srcset
43	PASS	image-policy: No <picture> elements	img_tags: 1; image_payload_bytes: 0	the publication pipeline's self-containment policy refuses <picture>
44	PASS	image-policy: Every image file is under the per-image size cap	img_tags: 1; image_payload_bytes: 0	the pipeline's 2MB per-image refusal cap
45	PASS	image-policy: No SVG carries script content	img_tags: 1; image_payload_bytes: 0	<script> elements are active content, refused on docs.oasis-open.org
46	PASS	image-policy: No SVG carries inline event handlers	img_tags: 1; image_payload_bytes: 0	on*= attributes are active content, refused
47	PASS	image-policy: No SVG references external image or use targets	img_tags: 1; image_payload_bytes: 0	external <image>/<use> hrefs break self-containment
48	PASS	image-policy: Total image payload is under the cumulative cap	img_tags: 1; image_payload_bytes: 0	the pipeline's 5MB cumulative inlining cap
49	PASS	pdf-cover: The document title appears exactly once on the PDF cover page	title: OpenEoX Core Schema Version 1.0; cover_page_occurrences: 1; runner_path_in_pdf: False	exactly 1 (more means stale title-block residue baked into the render, assertion A1)
50	PASS	pdf-cover: No CI runner path anywhere in the PDF text	title: OpenEoX Core Schema Version 1.0; cover_page_occurrences: 1; runner_path_in_pdf: False	the /home/runner/ path must not occur (assertion A2)
51	PASS	schema-id: Every .json file in the package parses as JSON	json_files: 2; expected_id_root: https://docs.oasis-open.org/openeox/eox-core/v1.0/	must parse without error
52	PASS	schema-id: A flattened \$id under the version root is a conscious convention	json_files: 2; expected_id_root: https://docs.oasis-open.org/openeox/eox-core/v1.0/	the file's publish path; a version-root flattened \$id (CSAF v2.0 style) needs a copy at that location
53	PASS	schema-id: Each schema's \$id agrees with where the file publishes	json_files: 2; expected_id_root: https://docs.oasis-open.org/openeox/eox-core/v1.0/	the canonical latest-version URL derived from the package path
54	PASS	schema-id: Schema-internal self-references agree with the declared \$id	json_files: 2; expected_id_root: https://docs.oasis-open.org/openeox/eox-core/v1.0/	the schema's own declared \$id
55	PASS	pdf-sync: The PDF cross-check toolchain is available	pdftotext: present; this_stage_base_in_pdf: True	pdftotext present; absent means the PDF front-matter cross-check is skipped here and runs at intake
56	PASS	pdf-sync: pdftotext executes against the PDF	pdftotext: present; this_stage_base_in_pdf: True	a clean execution
57	PASS	pdf-sync: The PDF is machine-readable	pdftotext: present; this_stage_base_in_pdf: True	exit 0
58	PASS	pdf-sync: The PDF front matter carries the canonical this-stage URL	pdftotext: present; this_stage_base_in_pdf: True	the this-stage base URL declared by the package front matter
59	PASS	pdf-sync: The PDF cites no unexpected other version of this spec	pdftotext: present; this_stage_base_in_pdf: True	the package's own version (previous-stage citations expected, anything else confirmed)
60	PASS	template: All required template front-matter sections are present	sections_found: Abstract, Chair(s), Citation format, Editor(s), Latest stage/version, Notices, Previous stage/version, Technical Committee, This stage/version; conformance_section: True	the template's required set: This/Previous/Latest stage, Technical Committee, Chairs, Editors, Abstract
61	PASS	template: Front-matter sections appear in template order	sections_found: Abstract, Chair(s), Citation format, Editor(s), Latest stage/version, Notices, Previous stage/version, Technical Committee, This stage/version; conformance_section: True	the canonical template ordering

#	Result	Condition verified	Value pulled (observed)	Compared against
62	PASS	template: A Conformance section exists	sections_found: Abstract, Chair(s), Citation format, Editor(s), Latest stage/version, Notices, Previous stage/version, Technical Committee, This stage/version; conformance_section: True	the TC Process requirement: every Standards Track Work Product carries conformance clauses
63	PASS	template-css: A non-canonical stylesheet keeps the template font family	stylesheet_links: 0; inline_style_blocks: 1	the template look: Liberation Sans / Arial / Helvetica
64	PASS	template-css: The HTML carries a stylesheet	stylesheet_links: 0; inline_style_blocks: 1	at least one styling source must be present
65	PASS	package-refs: Every file the document cites under its own stage path ships in the package	own_stage_citations_checked: 6	the cited relative path must exist as a file in the package
66	PASS	link-mismatch: Visible URL text and its link target agree	shown_target_pairs: 3	shown and target must be the same URL (a disagreement is a rename artifact)
67	PASS	double-slash: No relative link path contains a double slash	double_slash_paths: 0	single slashes only (the CDN 404s a double slash even where browsers tolerate it)
68	WARN	cover-hr: No horizontal rule between the OASIS logo and the title	Horizontal rule between the OASIS logo and the title: the publication CSS treats <hr> as a page break, which opens the PDF with a blank page. Harmless in other renderers; remove if publishing through the OASIS HTML-to-PDF path.	no --- / *** / ____ rule after the logo (the publication CSS renders it as a PDF page break)
69	PASS	pdf-fonts: pdffonts executes against the PDF	css_declared_families: couriernew, liberationsans; pdf_embedded_fonts: LibertinusSerif, NewCM10, NewCMMath	a clean execution
70	WARN	pdf-fonts: The PDF's embedded fonts are declared by the package's own CSS	PDF embeds fonts not declared by the package's own CSS: LibertinusSerif, NewCM10, NewCMMath. The CSS declares: couriernew, liberationsans. Confirm the divergence is intentional (pdffonts <file.pdf> re-checks this after a toolchain change).	the font families declared in the package's HTML/CSS (its own typography authority)
71	NA	manifest: manifest.json parses as JSON	NA: no manifest.json in the package (noted as informational)	must parse without error
72	NA	manifest: Every manifest item exists in the package	NA: no manifest.json in the package (noted as informational)	the package file tree
73	NA	manifest: Every manifest sha256 matches the file's actual digest	NA: no manifest.json in the package (noted as informational)	the digest recorded in the manifest
74	PASS	junk-files: No working directories inside the package	files_walked: 6	forbidden set: __MACOSX, .git, .venv, venv, node_modules
75	PASS	junk-files: No OS junk or editor backup files in the package	files_walked: 6	forbidden: .DS_Store, Thumbs.db, desktop.ini, and ~ / .bak / .orig / .swp suffixes
76	PASS	case: Every filename in the package is lowercase	md_docs_urls_scanned: 16; mixed_case_files: (none)	its lowercase form (the publication origin is case-sensitive; the canonical logo filename is exempt)
77	PASS	case: Every self-referential docs.oasis-open.org URL path is lowercase (markdown source)	md_docs_urls_scanned: 16; mixed_case_files: (none)	its lowercase form (case-sensitive origin; /templates/ paths exempt)
78	NA	case: Every self-referential docs.oasis-open.org URL path is lowercase (HTML render)	NA: evaluated on the markdown-source row for this package	its lowercase form (case-sensitive origin; /templates/ paths exempt)
79	PASS	symlinks: No symlink points at itself or an ancestor directory	symlinks_found: 0	must not equal or contain its own directory (deploys materialize symlinks into unbounded recursion)
80	PASS	dead-lists: No reference to a lists.oasis-open.org mailing address (markdown source)	md_lists_addresses: (none)	the dead-infrastructure rule: that mail host silently fails; comments route via Higher Logic
81	NA	dead-lists: No reference to a lists.oasis-open.org mailing address (HTML render)	NA: evaluated on the markdown-source row for this package	the dead-infrastructure rule: that mail host silently fails; comments route via Higher Logic

#	Result	Condition verified	Value pulled (observed)	Compared against
82	PASS	dead-lists: Links into the retired list archives are flagged for verification	md_lists_addresses: (none)	each must be individually verified while the archive infrastructure is retired
83	PASS	rfc-keywords: Normative key words are backed by an RFC 2119 citation	normative_keywords_present: True; rfc2119_cited: True; rfc8174_cited: True	an RFC 2119 citation must be present when key words are used
84	PASS	rfc-keywords: RFC 2119 citation is paired with RFC 8174	normative_keywords_present: True; rfc2119_cited: True; rfc8174_cited: True	the current template cites both 2119 and 8174 (uppercase-only clarification)
85	PASS	logo: The cover logo is the canonical OASIS logo	logo_sources: https://docs.oasis-open.org/templates/OASISLogo-v3.0.png	https://docs.oasis-open.org/templates/OASISLogo-v3.0.png
86	PASS	previous-stage: A stage past 01 cites its previous stage	pulled: the URLs in the markdown's Previous-stage block; no violating instance found	at least one docs.oasis-open.org URL required when the revision number exceeds 01
87	NA	previous-stage: A stage past 01 cites its previous stage on the HTML cover	NA: DOCX-render condition; this package carries no Word source	at least one docs.oasis-open.org URL required when the revision number exceeds 01
88	PASS	date-sync: The markdown front-matter date appears in the HTML	document_date: (not found); copyright_year: (not found)	the rendered HTML text (absence means the HTML came from a different revision)
89	PASS	date-sync: The copyright year matches the document date year	document_date: (not found); copyright_year: (not found)	the year of the front-matter document date
90	NA	generator: A DOCX-native render was produced by Microsoft Word	NA: DOCX-render condition; this package carries no Word source	must contain 'Microsoft Word' (a LibreOffice render differs in kind from the TC's precedent)
91	PASS	vml-fallback: Every VML image has an <![if !vml]> img fallback	vml_images: 0; img_fallbacks: 0	fallback count must cover VML count (the invisible-cover-logo class)
92	PASS	asset-refs: Every relative src/href the HTML references ships in the package	relative_refs_checked: 0; missing: 0	the package file tree; a missing target 404s on publication
